ACKNOWLEDGEMENTS

I put this manual together so that I might easily apply Traditional Chinese Medicine in a modern medical setting.

MAHALO

To the Tao for my chances and choices.

To my open and disciplined mind.

To my friends and family who supported my studies.

To my teachers who inspired me to understand.

To my students who continue to expand the understanding of this work.

Trust in the medicine.

Share the treasure.

Develop its effectiveness.

MAHALO

PREFACE

In ancient China, the Taoists believed that sickness came to those who were unrighteous, or lived incorrectly; sinned. Living morally and frugally, by collecting good deeds, was the principal technique for a Taoist adept to become an immortal, or harmonize the spirit with the source of creation. Merging the spirit with the source, or void, was considered the final step in spiritual cultivation, when an adept becomes a sage. This can be expressed in the state of the Taoist mind: being there, yet there is no form in it (*you*), and at the same time does not exist yet it accomplishes everything (*wu*).

"Maintain yourself in calm non-intervention, and there will be no need for exorcism or invocation; the Tao is here and not far away, and our fate lies in ourselves, not in the exterior world." –Zhuangzi

Thus, the Taoists developed a system of living that promoted longevity (conservation), prosperity (honesty), and happiness (contentment), and named it the way, or Tao. The Taoist longevity techniques also included: acupuncture and moxibustion, medicinal herbs, talismans and curses, therapeutic music, nutrition, and qigong. These longevity techniques were the core of what would later be called Traditional Chinese Medicine (TCM).

Traditional Chinese Medicine is an amazing treasure, in which its theories and practices are now available for all. Now, it is becoming more common that Traditional Chinese Medicine is being integrated into hospitals and Health Maintenance Organizations (HMO). Because of this, many TCM practitioners are getting patients referred by medical doctor specialists. Many of these patients have already been diagnosed with a common biomedical syndrome. Therefore, it is essential that these syndromes can be differentiated and treated using TCM.

This book serves as a quick reference guide that provides diagnostic differentiations and treatment plans for common biomedical (western) syndromes using Traditional Chinese Medicine. This book is targeted for TCM professionals. It is recommended that the reader have a background in TCM etiology, pathogenesis, and differentiation and treatment prior to using this manual. TCM etiology consists of the six exogenous factors, the seven emotional factors, food and drink, physical labor, unregulated sexual activity, traumatic injury, phlegm fluid and stagnant blood. Pathogenesis consists of disease occurrence, development, and change within the body. Differentiation consists of the eight principles, *qi* and blood, triple warmer, four portions, five elements, six meridian levels, meridians and collaterals, *zang-fu* organs, and finally common biomedical syndromes. Treatment consists of the combination of various acupuncture prescriptions and related point utilizing modalities, and herbal formulas.

The method in which the information was compiled involved the following procedure:

- 1) Discovering the most common syndromes that have known TCM treatment plans
- 2) Discovering the various TCM differentiations and symptoms associated with each common syndrome
- 3) Discovering various TCM treatment plans, including acupuncture and herbal prescriptions

The information is presented in tabular format for quick referencing. The common syndromes are classified according to anatomical system, and generally arranged from exterior to interior, or superior to inferior. The common syndromes are introduced by biomedical (western) definition, and then differentiated according to TCM by row. The first row after the biomedical definition will most often be general differentiation.

The table consists of four columns. Columns 1 and 2 differentiate common syndromes by compiling diagnostic information, while Columns 3 and 4 formulate treatment plans by compiling acupuncture and herbal prescriptions. These two TCM modalities represent a more simple scope of the five TCM modalities, acupuncture, herbology, tuina, qi gong, and nutrition. Acupoints can be applied also to bodywork (*tuina* and *qi gong*), while herbology can be applied also to nutrition.

Column 1 is diagnostic differentiation (or energetic pattern) and its causes, or etiology. Common syndromes are often translated into *pinyin*. Differentiations are in bold, while the causes are in regular script. The differentiations are often followed by one or more energetic etiologies and physical or emotional lifestyle causes. Sometimes biomedical differentiations will be included.

Column 2 is pathological symptoms, or effects, including signs, tongue, and pulse. Sign, tongue, and pulse designations are bold, while the symptoms are regular script. Sometimes, biomedical symptoms and pathogenesis will be included.

Column 3 is the acupuncture treatment plan including the general point prescription, supplemental point prescriptions, and in some instances auricular acupoints. This column may also include notes on moxibustion, plum blossom needling, electro-stimulation, cupping, hot packs, and other needling protocols. Points are given following a particular treatment plan or specific symptom. It is practical to use discretion when selecting from the given points (it is not necessary to use all the given points.) Treatment plans are given in bold, while points are regular script. General acupoints are demarcated by a bulls-eye symbol. General biomedical syndromes may also include remarks to be considered during treatment.

Column 4 is the herbal treatment plan including action categories (bracketed in bold), traditional formulas, patent formulas, and herbal modifications specific to certain differentiations. Following the formula the page number is given where the formula can be found. Traditional formulas come from *Bensky*, while patent formulas come from *Fratkin*. In some instances, key symptoms that differentiate the formula's use may be given after the page reference. See also the key prior to the tables.

Differential Scopes of Traditional Chinese Medicine:

The differential scopes which unfold from simple to complex, also demonstrate similarities in pathology.

DIFFERENTIATION OF TRADITIONAL CHINESE MEDICAL SYNDROME

Onset	Ba Gang: Foundation	Qi and Xue	San Jiao	Four Portions	Six Levels	Twelve Meridians/ Zang-Fu	Common Western Syndromes
Acute	<i>Yang</i> <i>Biao</i> (Exterior) <i>Re</i> (Hot) <i>Shi</i> (Excess)	Qi	Upper Warmer	Wei	Taiyang	SI/UB	
					Shaoyang	TW/GB	
				Qi	Yangming	LI/S	
			Middle Warmer		Ying	Taiyin	LI/Sp
			Ying	Shaoyin	H/K

Herbs

Note: Refer to the principal formula (**PF**) for specific 'preparations,' 'cautions and contraindications', 'TCM' diagnosis, and 'WCI' of their associated formulas.

[] = Action Categories (Bensky):	[Q] = regulate <i>qi</i> [Q-m] = promote movement of <i>qi</i> [Q-↓] = direct rebellious <i>qi</i> downward [B] = invigorate blood [B-i] = invigorate blood, dispel blood stasis [B-m] = warm menses, dispel blood stasis [B-t] = invigorate blood w/ traumatic injury [Bs] = stop bleeding [Bs-h] = clear heat, stop bleeding [Bs-t] = tonify and stop bleeding [SB] = stabilize and bind [SB-e] = stabilize exterior and lungs [SB-i] = restrain leakage from intestines [SB-k] = stabilize kidneys [SB-w] = stabilize womb [S] = calm spirit [S-h] = nourish heart, calm spirit [S-s] = sedate and calm spirit [W] = expel wind [W-s] = release wind from skin and channels [W-i] = extinguish internal wind [O] = open orifices [O-h] = clear heat, open orifices [O-c] = warm and open orifices [O-p] = scour phlegm, open orifices [P] = treat phlegm [P-d] = dry dampness, expel phlegm [P-h] = clear heat, transform phlegm [P-y] = moisten dryness, transform phlegm [P-n] = transform phlegm, dissipate nodules [P-c] = warm and transform cold-phlegm [P-w] = transform phlegm, extinguish wind [P-v] = induce vomiting to discharge phlegm [FS] = relieve food stagnation [X] = expel parasites	[P] = Recommended Patent Groups (Fratkin): 1 = pills for problems due to exogenous wind invasion 2 = patents for cough, phlegm, and labored breathing 2a = pills 2b = syrups 3 = pills to remove internal, toxic, and damp heat 3a = pills to remove internal and toxic heat 3b = pills to remove damp-heat 3c = fevers in infants and young children 4 = pills, liniments, and plasters for removing wind-damp 4a = pills 4b = plasters for external application 5 = products for blood stagnation, bleeding, and pain 5a = pills 5b = pills for heart congestion, angina, and stroke 5c = patents for external application 6 = pills for promoting digestion and relieving congestion at the center 7 = pills and extracts for tonifying and nurturing 7a = pills and extracts to tonify <i>qi</i> 7b = pills and extracts to nourish blood 7c = tonics for deficiency of <i>yang</i> 7d = tonics for deficiency of <i>yin</i> or fluids 7e = general and combination tonics 8 = pills to calm <i>shen</i> (restlessness and insomnia) 9 = pills to control endogenous liver wind and hypertension	Dosage: pt/pts = parts s = slice p = pieces
[E] = release exterior [E-e] = release early stage exterior [E-c] = release exterior cold [E-w] = release exterior wind-heat [E-h] = release exterior w/ head and neck disorders [E-↓] = release exterior w/ interior deficiency [E-↑] = release exterior w/ interior excess [H] = clear heat [H-q] = clear heat from <i>qi</i> level [H-b] = clear heat from nutritive level and cool blood [H-t] = clear heat, relieve toxicity [H-o] = clear heat from organs [H-↓] = clear deficient heat [H-s] = clear and relieve summer heat [↓] = drain downward [↓-h] = purge heat accumulation [↓-i] = moisten intestines, unblock bowels [↓-c] = warm <i>yang</i> , guide out accumulation [↓-w] = drive out excess water [R] = harmonize [R-s] = harmonize <i>shaoyang</i> disorders [R-h] = regulate liver and spleen (hepatic) [R-d] = regulate stomach and intestines (digestion) [Y] = moisten dryness [Y-d] = gently disperse, moisten dryness [Y-n] = enrich <i>yin</i> , moisten dryness [D] = expel dampness [D-u] = promote urination, leech out dampness [D-t] = transform damp turbidity [D-h] = clear damp heat [D-c] = warm and transform water and dampness [D-w] = dispel wind dampness [C] = warm interior cold [C-c] = warm channels, disperse cold [C-m] = warm middle, dispel cold [C-g] = rescue devastated <i>yang</i> [T] = tonify [T-q] = tonify <i>qi</i> [T-b] = tonify blood [Tqb] = tonify <i>qi</i> and blood [T-g] = warm and tonify <i>yang</i> [T-n] = nourish and tonify <i>yin</i>	[Q] = regulate <i>qi</i> [Q-m] = promote movement of <i>qi</i> [Q-↓] = direct rebellious <i>qi</i> downward [B] = invigorate blood [B-i] = invigorate blood, dispel blood stasis [B-m] = warm menses, dispel blood stasis [B-t] = invigorate blood w/ traumatic injury [Bs] = stop bleeding [Bs-h] = clear heat, stop bleeding [Bs-t] = tonify and stop bleeding [SB] = stabilize and bind [SB-e] = stabilize exterior and lungs [SB-i] = restrain leakage from intestines [SB-k] = stabilize kidneys [SB-w] = stabilize womb [S] = calm spirit [S-h] = nourish heart, calm spirit [S-s] = sedate and calm spirit [W] = expel wind [W-s] = release wind from skin and channels [W-i] = extinguish internal wind [O] = open orifices [O-h] = clear heat, open orifices [O-c] = warm and open orifices [O-p] = scour phlegm, open orifices [P] = treat phlegm [P-d] = dry dampness, expel phlegm [P-h] = clear heat, transform phlegm [P-y] = moisten dryness, transform phlegm [P-n] = transform phlegm, dissipate nodules [P-c] = warm and transform cold-phlegm [P-w] = transform phlegm, extinguish wind [P-v] = induce vomiting to discharge phlegm [FS] = relieve food stagnation [X] = expel parasites	1 = pills for problems due to exogenous wind invasion 2 = patents for cough, phlegm, and labored breathing 2a = pills 2b = syrups 3 = pills to remove internal, toxic, and damp heat 3a = pills to remove internal and toxic heat 3b = pills to remove damp-heat 3c = fevers in infants and young children 4 = pills, liniments, and plasters for removing wind-damp 4a = pills 4b = plasters for external application 5 = products for blood stagnation, bleeding, and pain 5a = pills 5b = pills for heart congestion, angina, and stroke 5c = patents for external application 6 = pills for promoting digestion and relieving congestion at the center 7 = pills and extracts for tonifying and nurturing 7a = pills and extracts to tonify <i>qi</i> 7b = pills and extracts to nourish blood 7c = tonics for deficiency of <i>yang</i> 7d = tonics for deficiency of <i>yin</i> or fluids 7e = general and combination tonics 8 = pills to calm <i>shen</i> (restlessness and insomnia) 9 = pills to control endogenous liver wind and hypertension	pt/pts = parts s = slice p = pieces

DERMATOLOGICAL

DIFFERENTIATION AND TREATMENT OF COMMON BIOMEDICAL SYNDROMES WITH ACUPUNCTURE AND HERBS			
DIFFERENTIATION		TREATMENT	
Syndrome: Etiology (Causes)	Pathogenesis: Symptoms (Effects)	Acupuncture	Herbs
DERMATOLOGICAL			
ACNE: a common inflammatory pilosebaceous disease characterized by comedones (blackheads), papules (small elevation of skin), inflamed nodules (swelling), pustules (superficial pus filled cysts), and (in extreme cases) canalizing and deep, inflamed, sometimes purulent (pus filled) sacs			
DERMATITIS (Eczema): superficial skin inflammation, characterized by vesicles (skin blister) (when acute), redness, edema, oozing, crusting, scaling, and usually itching [scratching or rubbing may lead to lichenification (thickening of skin)]			
Neurodermatitis: a nonspecific, pruritic skin disorder accompanied by an itching rash seen most commonly on the neck, and the folds of the elbows and knees, encountered mostly w/anxious, nervous individuals (esp. women) [sim to stress hives]			
Contact: an acute or chronic inflammation, often sharply demarcated, produced by substances in contact with the skin			
Seborrheic: an inflammatory scaling disease of the scalp, face, and occasionally other areas (sebum flows are usually normal)			
Seborrhea: greasy condition due to overactive sebaceous glands which usually occurs on the scalp, face and sternal regions			
Nummular: chronic dermatitis characterized by inflamed, coin-shaped, vesicular, crusted, scaling, and usually pruritic lesions			
Chronic hand and feet:			
Contact: see above			
Housewife: caused by household irritants (cleaners, etc.)			
Pompholyx: skin blisters on hands and feet			
Psoriasis: chronic skin disease w/ erythematous and scaling that can occur in any part of the body but characteristically occurring at the extensor surfaces of the knees and elbows; when the scales are scraped they produce a shiny silver sheen; not infectious; a small percentage of patients have rheumatoid arthritis			
Recalcitrant (resistant) pustulant			
Fungal Infection			
Generalized exfoliative: a severe, widespread erythema and scaling/shedding of the skin			
Stasis: persistent inflammation of the skin of the lower legs with a tendency toward brown pigmentation, commonly associated with venous incompetency.			
Localized scratch: a chronic, superficial, pruritic inflammation of the skin, characterized by dry, scaling, demarcated, lichenified plaques (thickened skin w/ accentuated markings) of oval, irregular, or angular shape			
FOLLICULITIS: a superficial or deep bacterial infection and irritation of the hair follicles, usually caused by staphylococcus aureus			
FURUNCLES (Boil): acute, tender, perifollicular inflammatory nodules resulting from infection by staphylococcus			
CARBUNCLES: a cluster of furuncles w/ spread of infection subcutaneously, resulting in deep suppuration (formation of pus), often extensive local sloughing [septic (infected w/pus producing organisms) tissue that becomes necrosed and separated from healthy tissue], slow healing, and a large scar			
SHI ZHEN: damp rash	S: eruption of small white pustules over whole body, lesions (typically on flexor surfaces, neck, face, and hands), itching, redness, dry cracked skin, sudden fever, yellow pus, eosinophilia (an increase in a particular white blood cell during allergy or parasitic infection)	Drain GV, eliminate heat from blood: ● GV10, GV12, LI4, UB40, Sp10, local acups (BL; strong stim; 1-2x/day)	[H-b] xi jiao di huang tang (76)
Heat and poison collecting in the organs:	P: rapid, slippery	Face: S2-3, M-UE-9, M-HN-3 High fever: GV14, LI11, Sp10 Delirium: GV26, M-UE-1, SI8, P4	Swelling w/o color change: [H-t] nei shu huang lian tang (80)
1) Stagnation of <i>qi</i> and blood 2) In infants and children: stagnant food; evil <i>qi</i> in Sp 3) In adults: damp-heat 4) Acute: wind-damp-heat penetrating the skin 5) Chronic: heat in blood (w/deficient blood)	Goose-foot wind: center of palm is mottled purple and white, hard, thick, dry, cracked skin, gradually spreading to whole hand	Neurodermatitis: LI11, Sp10, LI4, Sp6 (mod-strong stim; surround affected area; transverse ins criss-cross) Acne vulgaris: H9, Sp2, UB54, Lv11, K12 ● allergy, cheek, neurogatae, endocrine, testis, lung	Stubborn limb sores: [H-t] si miao yong an tang (85) [H-t] qing wen bai du yin (82) [H-t] wu shen tang (86) (popliteal region) [C-c] yang he tang (217) [C-c] zhong he tang (218)
Causes: 1) Excessive intake of alcohol or greasy foods 2) Exogenous pathogenic invasion		Eczema: GV14, LI11, Sp6, H7 Chronic eczema: Sp10, S36; (CP) Weeping eczema: UB60, UB54, TW5, SI3,	Lower extremity sores: [D-h] er miao san (195) Early stage measles, sores: [E-↓] yin qiao bai du san (54)
Neurodermatitis (chronic lichen			Diaper Rash:

DIFFERENTIATION AND TREATMENT OF COMMON BIOMEDICAL SYNDROMES WITH ACUPUNCTURE AND HERBS			
DIFFERENTIATION		TREATMENT	
Syndrome: Etiology (Causes)	Pathogenesis: Symptoms (Effects)	Acupuncture	Herbs
DERMATOLOGICAL			
ACNE: a common inflammatory pilosebaceous disease characterized by comedones (blackheads), papules (small elevation of skin), inflamed nodules (swelling), pustules (superficial pus filled cysts), and (in extreme cases) canalizing and deep, inflamed, sometimes purulent (pus filled) sacs			
DERMATITIS (Eczema): superficial skin inflammation, characterized by vesicles (skin blister) (when acute), redness, edema, oozing, crusting, scaling, and usually itching [scratching or rubbing may lead to lichenification (thickening of skin)]			
Neurodermatitis: a nonspecific, pruritic skin disorder accompanied by an itching rash seen most commonly on the neck, and the folds of the elbows and knees, encountered mostly w/anxious, nervous individuals (esp. women) [sim to stress hives]			
Contact: an acute or chronic inflammation, often sharply demarcated, produced by substances in contact with the skin			
Seborrheic: an inflammatory scaling disease of the scalp, face, and occasionally other areas (sebum flows are usually normal)			
Seborrhea: greasy condition due to overactive sebaceous glands which usually occurs on the scalp, face and sternal regions			
Nummular: chronic dermatitis characterized by inflamed, coin-shaped, vesicular, crusted, scaling, and usually pruritic lesions			
Chronic hand and feet:			
Contact: see above			
Housewife: caused by household irritants (cleaners, etc.)			
Pompholyx: skin blisters on hands and feet			
Psoriasis: chronic skin disease w/ erythematous and scaling that can occur in any part of the body but characteristically occurring at the extensor surfaces of the knees and elbows; when the scales are scraped they produce a shiny silver sheen; not infectious; a small percentage of patients have rheumatoid arthritis			
Recalcitrant (resistant) pustulant			
Fungal Infection			
Generalized exfoliative: a severe, widespread erythema and scaling/shedding of the skin			
Stasis: persistent inflammation of the skin of the lower legs with a tendency toward brown pigmentation, commonly associated with venous incompetency.			
Localized scratch: a chronic, superficial, pruritic inflammation of the skin, characterized by dry, scaling, demarcated, lichenified plaques (thickened skin w/ accentuated markings) of oval, irregular, or angular shape			
FOLLICULITIS: a superficial or deep bacterial infection and irritation of the hair follicles, usually caused by staphylococcus aureus			
FURUNCLES (Boil): acute, tender, perifollicular inflammatory nodules resulting from infection by staphylococcus			
CARBUNCLES: a cluster of furuncles w/ spread of infection subcutaneously, resulting in deep suppuration (formation of pus), often extensive local sloughing [septic (infected w/pus producing organisms) tissue that becomes necrosed and separated from healthy tissue], slow healing, and a large scar			
SHI ZHEN: damp rash	S: eruption of small white pustules over whole body, lesions (typically on flexor surfaces, neck, face, and hands), itching, redness, dry cracked skin, sudden fever, yellow pus, eosinophilia (an increase in a particular white blood cell during allergy or parasitic infection)	Drain GV, eliminate heat from blood: ● GV10, GV12, LI4, UB40, Sp10, local acups (BL; strong stim; 1-2x/day)	[H-b] xi jiao di huang tang (76)
Heat and poison collecting in the organs:	P: rapid, slippery	Face: S2-3, M-UE-9, M-HN-3 High fever: GV14, LI11, Sp10 Delirium: GV26, M-UE-1, SI8, P4	Swelling w/o color change: [H-t] nei shu huang lian tang (80)
1) Stagnation of <i>qi</i> and blood 2) In infants and children: stagnant food; evil <i>qi</i> in Sp 3) In adults: damp-heat 4) Acute: wind-damp-heat penetrating the skin 5) Chronic: heat in blood (w/deficient blood)	Goose-foot wind: center of palm is mottled purple and white, hard, thick, dry, cracked skin, gradually spreading to whole hand	Neurodermatitis: LI11, Sp10, LI4, Sp6 (mod-strong stim; surround affected area; transverse ins criss-cross) Acne vulgaris: H9, Sp2, UB54, Lv11, K12 ● allergy, cheek, neurogatae, endocrine, testis, lung	Stubborn limb sores: [H-t] si miao yong an tang (85) [H-t] qing wen bai du yin (82) [H-t] wu shen tang (86) (popliteal region) [C-c] yang he tang (217) [C-c] zhong he tang (218)
Causes: 1) Excessive intake of alcohol or greasy foods 2) Exogenous pathogenic invasion		Eczema: GV14, LI11, Sp6, H7 Chronic eczema: Sp10, S36; (CP) Weeping eczema: UB60, UB54, TW5, SI3,	Lower extremity sores: [D-h] er miao san (195) Early stage measles, sores: [E-↓] yin qiao bai du san (54)
Neurodermatitis (chronic lichen			Diaper Rash:

RHEUMATOLOGICAL/MUSCULOSKELETAL AND CONNECTIVE TISSUE

DIFFERENTIATION AND TREATMENT OF COMMON BIOMEDICAL SYNDROMES WITH ACUPUNCTURE AND HERBS			
DIFFERENTIATION		TREATMENT	
Syndrome: Etiology (Causes)	Pathogenesis: Symptoms (Effects)	Acupuncture	Herbs
RHEUMATOLOGICAL/MUSCULOSKELETAL AND CONNECTIVE TISSUE			
ARTHRITIS: a heterogeneous and systemic rheumatic disorder characterized primarily by inflammation of the axial skeleton and large peripheral joints Acute: quick onset of joint inflammation associated by pain, heat, redness and swelling Allergic: joint inflammation originating from allergen (ie. hypersensitivity to serum injection) Chronic: long persisting joint inflammation (many months to years) Degenerative (Osteoarthritis/Degenerative Joint Disease/Wear and Tear Disease): seen primarily amongst the elderly, accompanied by loss of cartilage about the joint, stiffness, and joint deformity (subchondral bony sclerosis, cartilage and bony proliferation at the joint margins, and osteophytes); most common form of arthritis; can effect all joints, but has special affinity to weight bearing joints (knees, hip, spine, shoulders, fingers); seen in men (usually before age 45) and women (after 45-55) Gonorrheal: joint inflammation secondary to gonococcal infection Gouty: joint inflammation due to an upset in uric acid metabolism; usually affects one joint at a time Hemophilic: joint inflammation seen in hemophiliacs (when blood clots improperly "bleeders") secondary to bleeding into a joint Menopausal: joint pain seen in women during the change in life; often clears after hormone treatments Rheumatoid: one of the most common chronic forms of joint inflammation, often affecting many joints simultaneously, characterized by pain and motion limitation; cause is unknown but thought to be infectious in origin Tuberculous: joint inflammation secondary to TB infection JOINT PAIN: pain may be due to a single pathological process or combined abnormalities; symptoms may be: Local: limited to joint, capsule, adjacent ligaments, muscles, or nerves Distant: causing radiation along the course of neurological bundles or brachialgia beginning anywhere from the spinal cord to the end of the extremity Referred: pain from diseased intrathoracic or upper abdominal organs			
BI ZHENG: numbness; arthralgia JINGBU SHANGJIN: cervical muscle and tendon injury DONG JIE JIAN: congealed shoulder (frozen shoulder)	BI ZHENG: S: paresthesias, muscle weakness, and reflex and sensory losses, limited range of motion Local: inflammatory, degenerative, and mechanical stress (synovitis, arthritis), bursitis (subacromial), tendinitis (supraspinatus syndrome, epicondylitis of elbow), capsulitis, fibromyalgia Distal: vascular and neurological disorders; neuralgia, paralysis, or spasm (spinal cord, nerve roots, peripheral nerves from cervical disk protraction, cervical spondylosis, carpal tunnel syndrome, etc.)	Spread qi and blood, relax the muscles, clear channels (Muscular Rheumatism/Joint Pain): <i>ashi</i> , GV14, UB11, LI15, LI11, TW5, LI4 MX: Chronic stage arthritis (cold) (warm affected area 10-20 min; 1-2x/day for 10TX) CP: Acute stage arthritis (hot): pain areas (BL w/ret 10-15 min; 1x/2-4 days for 5TX) ↗ Rheumatoid Arthritis: local body areas or painful joints, sympathetic, subcortex, neurogate, adrenal, endocrine, occiput, kidney, triple warmer, helix #1-6 (1x/day or alt for 10TX; can embed intradermal needles for 3-5 days) ↗ Osteoarthritis: local body area, shoulder, clavicle, neurogate ↗ Bone Fracture: local body area, neurogate, subcortex, kidney ↗ Muscle Sprain: local body area, muscle relaxation, neurogate, subcortex, hot, liver	DJD (Osteoarthritis)/Chronic: [E-c] <i>ma xing yi gan tang</i> (35) (acute stage joint swelling) [E-c] <i>gui zhi fu zi tang</i> (37) (severe pain, redness and swelling, chill-phobia, inflammation, tender to touch, decreased range of motion) [I-i] <i>ji chuan jian</i> (125) [D-u] <i>fang ji huang qi tang</i> (179) (deformed knee joints in overweight women) [D-w] <i>juan bi tang</i> (204) (rheumatoid/gouty/bursitis) [D-w] <i>gui zhi shao yao zhi mu tang</i> (205) (swollen emaciated fingers) [D-w] <i>yi yi ren tang</i> (206) (swollen joints w/painful movement, esp. upper body) [D-w] <i>du huo ji sheng tang</i> (207) (chronic low back pain) [T-n] <i>jin gui shen qi wan</i> (275) [B-t] <i>huo luo xiao ling dan</i> (329)
Blockage of qi or blood (Bi Syndrome): excesses invade exhausted, injured or asleep people: 1) Wandering/Moving (wind) 2) Fixed/Heavy (damp) 3) Febrile (heat) 4) Pain (cold) 5) Chest (heart)	Osteoarthritis: 1) Deficient K 2) Deficient K <i>jing</i> 3) Deficient Lv 4) Deficient qi w/stagnation 5) Blood stasis 6) Wind-damp <i>bi</i> 7) Dysfunction of YgL	Osteoarthritis: deep aches and pains, stiffness upon awakening, insomnia induced from pain and stiffness, tenderness to palpation and Heberden's nodes (distal)	Rheumatoid arthritis: [E-c] <i>ma huang jia zhu tang</i> (34) (cold- <i>bi</i>)

DIFFERENTIATION AND TREATMENT OF COMMON BIOMEDICAL SYNDROMES WITH ACUPUNCTURE AND HERBS			
DIFFERENTIATION		TREATMENT

DIFFERENTIATION		TREATMENT	
Syndrome: Etiology (Causes)	Pathogenesis: Symptoms (Effects)	Acupuncture	Herbs
Fixed/Heavy: damp 1) Damp-cold 2) Damp-heat 3) Stagnation of <i>qi</i> in big joints during cold and wet seasons	S: fixed pain, heavy, swelling (edema), numbness, popping sound during joint movement T: greasy P: slippery, slow, moderate	Drain damp, open channels, dispel cold: (ACU-MX) S36, Sp5 → Stretching is effective	[D-w] <i>juan bi tang</i> (204) [D-w] <i>gui zhi shao yao zhi mu tang</i> (205) [D-w] <i>xuan bi tang</i> (206) [D-w] <i>du huo ji sheng tang</i> (207)
Painful: cold 1) Deficient blood 2) Deficient blood and <i>qi</i> 3) Deficient K yang 4) Dysfunction of YgH, YgL 5) Excess in YnH	S: severe fixed pain in joint or muscle, stiffness, pain aggravated by cold and relieved by heat T: thin, white coat P: tight, wiry	Warm channels, dispel cold ◎ S36 MX: CV4, CV6, UB23, GV4	[B-i] <i>shen tong zhu yu tang</i> (316)
Febrile: heat	S: hot flesh, redness, swelling, inflammation, mouth and tongue is parched, dark urine, constipation, irritability, pain aggravated by heat and relieved by cold T: yellow coat, greasy P: rapid	Clear heat, open channels: BL: GV14, LI11 Myositis: GV12, UB20, S36, Sp6	[H-q] <i>bai hu jia gui zhi tang</i> (71) [H-q] <i>bai hu jia cang zhu tang</i> (72)
XIONG BI: chest numbness Heart (local): 1) Obstructed yang <i>qi</i> in chest w/phlegm fluid ascending 2) Cold and rebellious <i>qi</i> ascends	S: chest distention, palpitations, panting, irritability P: deep, full, slow, slippery	Drain phlegm fluid from H to clear obstruction: Lv13-14, P6, H7, UB17, CV17, GV12, GV10, UB13, L5, CV12, S36 Cold: UB16	
TEMPOROMANDIBULAR JOINT (TMJ) DISORDER: jaw disorders (clenching the teeth) which is susceptible to common congenital and developmental anomalies, fractures and dislocations, ankylosis, arthritis, and neoplastic diseases.			
Wandering bi		Expel wind: S7, LI4, UB20, TW21, SI19, GB2, S6, TW17 ◎ Maxilla, mandible, cervical vertebrae, neurogait, subcortex	See wind blockage above
LOW BACK PAIN (Lumbago): is felt in the low lumbar, lumbosacral, sacroiliac region; often associated w/sciatica Acute sprain of lower back Chronic low back pain			

DIFFERENTIATION AND TREATMENT OF COMMON BIOMEDICAL SYNDROMES WITH ACUPUNCTURE AND HERBS			
DIFFERENTIATION		TREATMENT	
Syndrome: Etiology (Causes)	Pathogenesis: Symptoms (Effects)	Acupuncture	Herbs
YAO TONG: lumbago Obstruction of <i>qi</i>: 1) Blood stagnation (traumatic) 2) Cold-damp 3) Damp-heat 4) Deficient K yang 5) Deficient K yin (see also 'osteoarthritis' above)		Spread <i>qi</i> through the meridians, relax muscles, activate blood: ☺ UB23, UB25, UB40, UB57, UB60, UB17, GV3-4, N-UE-19 (3-5 acups w/mod-strong stim to project numbness down leg; acute: 1x/day and 1x/2-3 days as condition improves) ES: (strong, high frequency for 5-10 min) CP: M-BW-35 (L2-5) (tap w/cutaneous needle to cause slight bleeding, then apply cups) ☺ ischium, adrenal, buttocks, sciatica, neurogate, lumbar-sacral, thoracic vertebrae, urinary bladder (ret for 10-30 min; embed intradermal needles for 3-7 days) Lumbosacral: M-BW-25, UB30-32, UB24-26, UB51-52, UB54, S36 Sacroiliac: UB27-28 Hip: GB29-31, GB34, GB39-40, S31, Lv11, GB26-28, UB30-32 ☺ lumbar vertebrae, lumbago, neurogate, subcortex, adrenal (ret 15-20 min; 1x/day; embed intradermal needles 1-7 days) → Manipulation and HP may be used in conjunction w/ACU	Chronic: [D-w] <i>du huo ji sheng tang</i> (207) Severe: [↓-i] <i>da huang fu zi tang + rou gui + xiao hui xiang</i> (126) [↓-w] <i>kong xian dan</i> (129) [T-g] <i>qing e wan</i> (280) Acute sprain: [E-c] <i>jiu wei qiang huo tang</i> (40) [B-t] <i>fu yuan huo xue tang</i> (326) Soreness/Weakness: [T-n] <i>liu wei di huang wan</i> (263) [T-n] <i>zuo gui yin</i> (266) [T-g] <i>you gui yin</i> (280)
Obstruction of <i>qi</i> (acute sprain): GV and UB meridian obstruction and injury due to traumatic sprain or contusion Blood stagnation	S: fixed, sharp pain, tenderness, spasm, mild in daytime and worse at night (poor circulation during <i>yin</i> hours), stiffness (mild), limited mobility (severe) T: pink or dark purple P: hesitant, tight, rapid, wiry, choppy	Move blood, resolve stagnation, regulate <i>qi</i> (acute sprain): ☺ GV26 (strong stim); BL: K2, UB40 (1x/day)	[B-i] <i>shen tong zhu yu tang</i> (316) [B-t] <i>fu yuan huo xue tang</i> (326) {5a} <i>qian lie xian wan</i> (93) (prostate inflammation) Trauma: {5c} <i>shen xian jin bu huan gao</i> (110) {5c} <i>die da zhi tong gao</i> (111) {5c} <i>shang shi bao zhen gao</i> (113)

DIFFERENTIATION AND TREATMENT OF COMMON BIOMEDICAL SYNDROMES WITH ACUPUNCTURE AND HERBS			
DIFFERENTIATION		TREATMENT	
Syndrome: Etiology (Causes)	Pathogenesis: Symptoms (Effects)	Acupuncture	Herbs
Obstruction of <i>qi</i>: obstructed UB meridian (muscle) due to cold-damp invasion	S: obesity, pain aggravated by rainy days, heavy sensation and muscle stiffness in lumbar region, pain radiating down legs T: white w/sticky coat P: deep, weak, slow	Drain cold-damp, warm and open the channels: UB22, UB26, UB48	[E-c] <i>jiu wei qiang huo tang</i> (40) [↓-i] <i>da huang fu zi tang + rou gui + xiao hui xiang</i> (126) [↓-w] <i>kong xian dan</i> (129) [D-w] <i>du huo ji sheng tang</i> (207) (chronic) [C-c] <i>yang he tang</i> (217) [T-g] <i>qing e wan</i> (280) (severe) [P-c] <i>gan cao gan jiang fu ling bai zhu tang</i> (444)
Obstruction of <i>qi</i>: obstructed UB meridian (muscle) due to damp-heat invasion	S: fever, swelling and redness, scanty and yellow urination, exercise eases pain T: yellow, greasy coat P: slippery, rapid	Clear heat, drain damp, open channels, sooth tendons: LI11, GV14, GB34	{4a} <i>qian jin zhi dai wan</i> (56) {4a} <i>yu dai wan</i> (62) {4a} <i>feng shi xiao ton wan</i> (71) {7c} <i>yao tong pian</i> (164)
Obstruction of <i>qi</i> (chronic pain): deficient K <i>qi</i> or <i>yang</i> due to excessive sexual activity	Deficient yang: S: gradual onset of pain and soreness, weak loins and knees, fatigue, pallor, cold limbs T: pale P: deep, thin, or deep, slow	Nourish K <i>yang</i> (chronic pain): ◎ UB40, UB60, UB22-23, M-BW-24, CV6 (mod-strong stim; ins in multiple directions w/muscle spasms; ES; HP) MX: UB23, UB25, M-BW-24-25, GV3-4 (sticks for 5-10 min/1-3 indirect cones; 1x/day or alt) CP: UB23, GV3, UB32 (TX 1x/day or alt); low back UB (TX 1x/2-3 days)	[T-g] <i>jin gui shen qi wan</i> (275) [T-g] <i>zan yu dan</i> (281) [T-g] <i>tu si zi wan</i> (280) [T-g] <i>you qui yin</i> (280) (soreness) [T-g] <i>qing e wan</i> (280) (severe) {7c} <i>yao tong pian</i> (164) {7c} <i>ba wei di hung wan</i> (165) {7c} <i>jin kui shen qi wan</i> (171) {7c} <i>hai ma bu shen wan</i> (176) {7e} <i>ren shen lu rong wan</i> (198) (K+Sp+H) {7e} <i>zhi bao san bian jing</i> (205) (K+Sp+L)
Deficient K <i>yin</i>	Deficient yin: S: irritability, insomnia, dry mouth and throat, flushed face, feverish sensation in chest, palms and soles, tinnitus, night sweats T: red w/scanty coating P: thin, weak, or thin, rapid	Nourish K <i>yin</i>: UB52, K3, CV4, CV6	[T-b] <i>dang gui sheng jiang yang rou tang</i> (253) [T-n] <i>liu wei di huang wan</i> (263) (soreness) [T-n] <i>zhi bai di huang wan</i> (265) [T-n] <i>zuo gui yin</i> (266) (soreness) {7d} <i>liu wei di huang wan</i> (188)

FIBROMYALGIA: widespread pain, tenderness and stiffness of muscles, tendons, and ligaments of greater than 3 months duration, usually accompanied by fatigue and anxiety or depression; the tissues of the occiput, low back (lumbago), neck (neck pain and spasm), shoulders, thorax (pleurodynia = flank pain along the chest), and thighs (aches and spasms) are especially affected; may be a complication of hypothyroidism and chronic fatigue syndrome

DIFFERENTIATION AND TREATMENT OF COMMON BIOMEDICAL SYNDROMES WITH ACUPUNCTURE AND HERBS			
DIFFERENTIATION		TREATMENT	
Syndrome: Etiology (Causes)	Pathogenesis: Symptoms (Effects)	Acupuncture	Herbs
Fibromyalgia: 1) Lv <i>qi</i> stagnation 2) <i>Qi</i> stagnation and blood stasis 3) Deficient Sp 4) Deficient K 5) Deficient blood 6) Deficient <i>jing</i> 7) Cold in the channels w/damp-heat 8) Dysfunction of YgH/YnH Causes: 1) Physical or mental stress or trauma, chronic overwork 2) Poor sleep/disorders 3) Over-exposure to dampness or cold 4) Viral infection	S: specific points of tenderness (trigger points), chronic aching, stiffness, sleep disturbances, insomnia, pain, numbness, paresthesias (burning and tingling associated w/heuritis), swelling, chronic fatigue (esp. on waking, also at 3-5 pm), low grade fever, swollen lymph nodes, sinusitis, anxiety, depression, chronic HA, GI disturbance, chest pain, dizziness, palpitations	Fibromyalgia: ◎ Trigger points (MX; circling area w/needles) Sinusitis: L7, TW16-17, S3, LI10, S43 → Use very light stim and short needle ret → Palpate abdomen to located tender and knotty area (stagnant <i>qi</i> and blood)	
Lv <i>qi</i> stagnation/constraint		Clear Lv/GB, clear damp-heat, move Lv constraint: UB18, GB20-21, LI11, P6, H6-7, Lv13-14, Sp6, GB34, GB37-41, Lv1-8	[R-s] <i>chai hu gui zhi tang</i> (138)
<i>Qi</i> stagnation and blood stasis		Facilitate <i>qi</i> and blood flow: SI10, UB11, LI4, K16, S30, Sp6, Sp4, Sp2, K4	[T-qb] <i>gui pi tang</i> (255) [T-qb] <i>ren shen yang ying tang</i> (260)
Deficient Sp		Tonify Sp yang: UB20, CV12, S36, Sp6	[T-qb] <i>gui pi tang</i> (255) [T-qb] <i>ren shen yang ying tang</i> (260)
Deficient K		Tonify K yang: UB38, UB43, UB23, GV4, M-BW-23-24, GB30-31, K27, K24, K16, CV6, K3	[T-g] <i>jin gui shen qi wan</i> (275)
Deficient blood		Tonify blood: UB17, CV4, Sp6, K3	[T-b] <i>si wu tang</i> (248)
Deficient <i>jing</i>		Distribute <i>jing</i> to genitals: S30, K3-4	
Cold in the channels w/damp-heat		Dispel cold, clear damp-heat: UB11, UB18, GB30-31, TW7, GB34, S30, Sp10, GB37-41, K6-7, K3	[C-c] <i>dang gui si ni tang</i> (216)
Dysfunction of YgH/YnH		Open Ygh/YnH: TW5, SI3, K6, UB62	

NEUROLOGICAL

DIFFERENTIATION AND TREATMENT OF COMMON BIOMEDICAL SYNDROMES WITH ACUPUNCTURE AND HERBS			
DIFFERENTIATION		TREATMENT	
Syndrome: Etiology (Causes)	Pathogenesis: Symptoms (Effects)	Acupuncture	Herbs
NEUROLOGICAL			
HEADACHE (HA): cephalgia			
Functional: marked by organic signs and symptoms but w/o evidence of structural or physiologic abnormalities; upset function			
Organic: progressive deterioration of brain structure or physiology			
Vascular:			
<u>Migraine:</u> a recurring vascular HA characterized by a prodromal aura, unilateral onset, severe pain (throbbing), photophobia, and autonomic disturbances during the acute phase which may last hours or days; the disorder occurs more frequently in women than men (usually occurs between the age of 10-30, and remissions occur after age 50 suggesting a hormonal influence); a predisposition to migraine may be inherited; the exact cause is unknown, but the head pain is related to dilation of extracranial blood vessels, which may be the result of chemical changes that cause spasms of intracranial vessels; allergic reactions, excess carbohydrates, iodine rich foods, alcohol, bright lights, or loud noises may trigger attacks, which often occur during a period of relaxation after physical or psychic stress; an impending attack may be heralded by visual disturbances, such as wavy lines, flashing lights, strange tastes or odors, numbness, tingling, vertigo, tinnitus, or a feeling of body distortion; the acute phase may be accompanied by nausea, vomiting, chills, polyuria, sweating, facial edema, irritability, and extreme fatigue; after an attack the individual usually has a dull head, neck pains, and a great need for sleep			
<u>Cluster (Histamine):</u> associated w/the release of histamine from the body tissues and marked by symptoms of dilated carotid arteries, fluid accumulation under the eyes, tearing or lacrimation, and rhinorrhea (runny nose); symptoms include sudden sharp pain on one side of the head, involving the facial area from the neck to the temple; occurs more frequently in men; also called suicide HA			
<u>Hypertension:</u> typically throbbing and located in the occiput or vertex; paroxysmal; there is a history of renal or cardiovascular disease			
<u>Miscellaneous:</u> toxic states, infections, alcoholism, uremia, lead, arsenic, morphine, carbon monoxide, poison, encephalitides; moderate intensity			
Sinus: from sinusitis			
Tension: HA as a result of overwork, or emotional strain, and involving tension in the muscles of the neck, face, and shoulder			
TOU TONG: headache	HA Location:	HA:	Influenza:
1) External wind penetrates yang channels	<u>Frontal:</u> S; <i>yangming</i> <u>Temporal/Parietal:</u> Lv/GB; <i>shaoyang</i> <u>Vertex:</u> Lv; <i>jueyin</i> ; K/UB; <i>shaoyin/taiyang</i>	◎ GB20, M-HN-9, GV20, Lv3, GB8, TW3, LI4 (first needle GB20 until sensation extends to fronto-temporal region; needle w/small amplitude until <i>qi</i> arrives, then vigorously) ◎ subcortex, forehead, occiput, kidneys, pancreas, gallbladder, tender acups (manipulate every 5 min; w/persistent HA use strong stim for 5 min; embed intradermal needles for 1-7 days)	[E-w] <i>chuan xiong cha tiao san</i> (49) + <i>gao ben</i> (occipital- <i>taiyang</i>) + <i>chai hu</i> (temporal- <i>shaoyang</i>) + <i>gegen</i> (frontal- <i>yangming</i>) + <i>wu zhu yu + di long</i> (vertex- <i>jueyin</i>)
2) Excess Lv <i>yang</i>	<u>Supraorbital:</u> S/UB; <i>yangming</i>		
3) Stagnant blood	<u>Occipital/Cervical:</u> UB; <i>taiyang</i>		
4) Deficient K <i>qi</i> and blood	<u>Heavy:</u> TW		
5) S heat, Lv/GB fire			
6) Phlegm and damp			
7) Phlegm heat rebels upward			
Differential Causes:	Migraine: unilateral or bilateral (often located about or behind the eye spreading to one or both sides), nausea and vomiting, desire for darkness and quiet, HA duration is hours to 1-3 days	Frontal: GB14, UB2, S8, M-HN-3, GV23, S44, S3, GV14, S40 Supraorbital: UB2, GB14, M-HN-9 Vertex (parietal): GV19-21, Lv3, SI3, UB67 Temporal: M-HN-9, GB8, TW3, TW5, GB41 Unilateral: SI8, GB4-5, GB41 Occipital: UB10-11, UB60, SI3	Frontal: [H-o] <i>yu nu jian</i> (94) (frontal) [R-s] <i>chai hu zhi jie tang</i> (138) (lateral-frontal) [Y-d] <i>sang xing tang</i> (159) (supraorbital ridge)
<u>Organic:</u>	Prodomal: scintillating scotomas, mood swings, dizziness and tinnitus, dazzling zigzags	Vertex: [T-q] <i>bu zhong yi qi tang</i> (243) + <i>man jing zi</i> and <i>chuan xiong</i> (pronounced) + <i>gao ben</i> (vertex)	
1) Intracranial: brain tumor, brain abscess, subdural hematoma, meningeal irritation (acute), cancer, subarachnoid hemorrhage			
2) Cranial: metastatic neoplasms, Paget's disease			
Involvement of sensory nerves of	Hypertension: throbbing pain in	Congestive (sinus): UB62	Migraine/Tension/Cluster (vascular): [E-h] <i>chuan xiong cha tiao san</i> (49) [H-t] <i>xie xin tang</i> (79) [H-o] <i>long dan xie gan tang</i> (96)
